

# HEALTHY WESTON EVENTS

Joining up services for better care in the Weston area including Weston General Hospital

North Somerset CCG wants to hear your views on how we can change and improve services at Weston General Hospital and other local NHS and care services in the Weston area to make sure people have the best possible health and care services suitable for their needs now and in the future.

*Healthy Weston: joining up services for better care in the Weston area* was published in October and sets out how key local services such as GPs, community services, mental health, voluntary organisations and social care can work together to deliver more joined up care in the community and work more closely with Weston General Hospital.

Come along to one of our public events and tell us what you think about:

- Building a strong and vibrant future for Weston General Hospital
- Developing stronger GP services
- Creating a 'care campus' at Weston General Hospital so that hospital, GP and community health services work better together to care for patients.
